

IMPORTANT CONSIDERATIONS WHILE PURCHASING LEVER ON ROSE DOOR HANDLES OR MORTICE DOOR KNOBS

Here is a quick reminder and guide to other door accessories and security items you may require completing your door handle installation. Please remember to purchase matching finishes for all items.

One of the most important things to consider while purchasing the door handle is the security type required for the room you are purchasing for. Please refer to the correct section below for type of handle you are purchasing.

Latch and Lock Sizes (internal mechanism) –

We recommend 76mm case-size (57mm backset) latches and locks to ensure plenty of space for hand clearance.

However, we also offer 64mm case-size (45mm backset) if you are simply looking to replace your existing ones and this is the size you already have installed.

Lever Latch Door Handles –

For standard rooms such as dining and living rooms, hallways, kitchens and common rooms.

You will require:

- 1) Tubular Latch

Bathroom Doors Handles –

For bathrooms to enable privacy a thumbturn and release is to be purchased separately and installed under the door handle to lock and unlock the door.

You will require:

- 1) Bathroom Mortice Lock – This is the locking mechanism which is installed inside the door to operate the door handle and thumbturn

Key Lock Door Handles –

For private rooms such as bedrooms or storage rooms you may want to lock the door with a key for security.

You will require:

- 1) Mortice Sashlock - These are available in different security levels ranging from 2 levers (low security) to 5 levers (high security) and come with 2 keys.
